-

Our tanks are specially designed for Fire Services and designed to meet NFPA and ULC standards. Our semi-elliptical tanks provide the lowest possible center of gravity in accordance with DOT406, CAN / ULC S-515-04, NFPA

In 20 years, no (0%) claim and (0%) repair on our tanks delivered demonstrating the superiority of the product without any hesitation.

NFPA/ULC Longitudinal and transverse baffles

Aluminum(lifetime warranty) vs Poly is:

- 2.98 times more dense (g/cm²)
- 62.72 times more elastic (GPA)
- 3.92 times more resistant to high temperature (° C)
- 20.83 times more rigid versus its weight (MN-m/kg)
- 2.12 times more strong versus its weight (kN-m/kg)
- 20.0 less fragile times at -40 ° F and +.
- 1.55 times faster unloading.
- 9.75 times more resistant to pressure from loading
- 6.30 times more elastic (MPa)
- Much safer thanks to its centre of gravity very low more easy maintenance.
- Much easier to repair and maintain.
- Tensile strength of polypropylene is 4,500 psi
- Tensile strength of aluminium is 44,000 psi

○ Additional equipment not included with purchase unless otherwise listed. Mileage readings may not be real-time and should be confirmed.

○ Air Ride
Full-lock differential
46,000 Air liner rear suspension
5.86 Rear axle Ratio
Freightliner Air horns
