○ Additional equipment not included with purchase unless otherwise listed. Mileage readings may not be real-time and should be confirmed.

WHAT SMART TRAILER PROVIDES ON SCENE:

Refuge from the elements	Dynamic Cooling/Warming of Personnel	Oxygen Being
Air-fill Station (SCBAs) and Cylinder Storage	Elevated Observation Platform	LED-Illuminated/Dry Erase Interior Walls
Hydration and Nutrients	Restrooms	Decon Shower
Battery Chargers and Cache (Radio, TIC, Flashlights)	WiFi – Bluetooth Compatible	12v/120v/USB

USES:

Pre-Hab/Rehab	Incident Command Post	Special Ops/Black Ops
MCI and Disaster Wildland Firefighting	Extended Ops	Public Relations

FRONT

Our SMART Trailers are custom built for your needs and capable of self-sustained operational support for over 24 hours. We offer a bumper-pull, gooseneck/fifth wheel, or a truck chassis designed platform in three sizes: 20', 24', and 28'. As a custom shop, fabrication is our specialty – if you can dream it – we can build it.

Equipped with remote-controlled, self-leveling hydraulic jacks/stabilizers, the SMART Trailer may detach from the tow vehicle for deployment on extended operations.

ROADSIDE

Each SMART Trailer is equipped with a generator and enough fuel capacity to support 24-hours of operation or more.

Both sides of the SMART Trailer are equipped with adjustable power awnings, LED strip lighting, and power outlets.

The Mechanical Room, climate-controlled, is home to the Control Center, Fill-Station, SCBA storage and the O2 cylinders.

The SMART Trailer offers one or two climate-controlled restrooms, including a sink with hot and cold water and easy access to plumbing.

A decon shower is available with hot and cold water, drop-down curtains, and diamond-plate shelving.

Below, are two useful cargo/storage areas with rubberized flooring and lockable roll-up doors.

REAR

Our stowable aluminum ladder leads to the Observation Platform on the roof, where the IC or others enjoy an elevated vantage point.

The rear door, covered with a smooth but durable surface, serves as a ramp.

On opposing corners, LED scene lights telescope and rotate 360-degrees to light up the area.

CURBSIDE

Our slide-out kitchen offers a stainless steel sink, complete with hot and cold water (required by OSHA), a microwave, coffee-maker, and power outlets.

The large roll-up doors provide access to the horizontally-stored SCBA-cylinders and landing pads.

CLIMATE CHAMBER

Our Climate Chamber is the heart of the SMART Trailer. It's where the magic happens – the paradigm of PRE-Hab/RE-Hab. It's here, before entering harm's way, personnel are pre-cooled, pre-hydrated, pre-oxygenated, briefed, and baselines, established.

Upon return from action, personnel and their equipment are completely and comprehensively RE-Hab'd. They are re-assessed, cooled, hydrated, oxygenated, and fed; meanwhile, air cylinders, batteries from radios, flashlights, and TIC's are refilled, recharged, or replaced.

The Climate Chamber has LED Lighting, 12v/120v/USB ports, and plenty of cabinet space for beverages, nutritional replacements, or other equipment.

Brindlee Mountain Fire Apparatus is one of the world's largest used fire truck sales and service companies. Based just outside of Huntsville, Alabama, the company has forty-five full-time personnel occupying over 12,000 square feet. Our mechanics, all of whom are EVT certified, perform pump tests, general repairs, preventative maintenance, and body, collision, and paint work on over 500 used fire trucks every year.
