100' Extension Cord Reel

Decals have been removed, but
impression remains

Seats Torn

Holes in Dash from Removed Equipment

Siren: Federal Signal PA300

Apparatus Maintained Every 180 Days

Seller's Information About this Truck:

I did a phone interview with a firefighter who drove this truck. There is no air conditioning, you can just roll down the windows. The truck has pretty good acceleration - and it stops like it should without any problems. It was used in a small beach town (Wrightsville Beach, NC), and so the truck was never driven more than 10 mph over the speed limit. It is reasonably comfortable - and for the ease of driving, it is a relatively smaller truck and the driver said it's pretty easy to get around in this truck on the streets. The maintenance was always done properly and the inspections were always done on time. The truck was painted about five years ago. The garage who handled the maintenance of the truck was really good about the quality of the work they did on the truck.

Decals Have Been Removed, But
Impressions Remain. Seats Torn. Holes
In Dash From Removed Equipment. Siren:
Federal Signal Pa300. Apparatus
Maintained Every 180 Days.

The truck has a TS471 Custom Fire
Chassis.

There is a gigantic 4-inch thick Mack Truck
Service manual (from the Mack world
headquarters). This book was made for
the town of Wrightsville Beach, NC, on July
21, 1988. The book is NOT a typical 3-ring
binder, and has 19 tabbed sections. The
book is in very good shape.
The sections of the book are:

General Date - Fastener Torque Manual;
Engine - 6 Cylinder, Four Valve Head
(4VH) Overhaul Manual (This Section Is
About 140 Pages); Fuel System; Cooling
System; Electrical System; Clutch
Removal Manual; HFB70 Service Manual
by TRW; Rear Axels/Carriers; Frame,
Spring, and Suspension; Wheels, Rims,
and Tires; Air Brake System; MH Cab
Repair; Engine Bearing Failure Analysis;

Brindlee Mountain Fire Apparatus is one of the world's largest used fire truck sales and service companies. Based just outside of Huntsville, Alabama, the company has forty-five full-time personnel occupying over 12,000 square feet. Our mechanics, all of whom are EVT certified, perform pump tests, general repairs, preventative maintenance, and body, collision, and paint work on over 500 used fire trucks every year.
