Union Grove, AL 35175  
Stock #: 08134  
Price: \$35,000

1986 Grumman Duplex 102' Quint Platform

- 1986 Grumman Duplex 102' Quint Platform
- Detroit 8V92TA Diesel Engine
- Additional equipment not included with purchase unless otherwise listed. Mileage readings may not be real-time and should be confirmed.
- Duplex Chassis
- 5-Speed Automatic Transmission
- Seller's Information About this Truck:  
I did a phone interview with someone from the Kill Devil Hills Fire Department, to clarify the mileage and discuss a few things about the truck, in general.
- Grumman Fire Body
- Mileage: 24,495

The reason the mileage is so low is as follows. The town of Kill Devil Hills is a small beach town (in NC) only about five miles long. Plus, until the mid-90s, when the bridges were redone, the truck did not drive over the bridges because of the gross vehicle weight. They were only running 3 firefighters on a shift, etc. In fact, the main mileage was put on the truck when they would occasionally take the truck to Virginia, do get different major, required maintenance services done. In general, most other regular maintenance for the truck were done at the fire house.

I also spoke with someone who drove the truck. There is no AC. The truck accelerates alright and brakes very good.

Of course, compared with newer "aluminum" trucks, it might feel a little sluggish, if you need quick speed. In general it drives fine, turns easily, and is a very solid, well-constructed truck. It is comfortable to drive. Three firefighters can sit in the cab and two can sit outside.

The truck was maintained very well for all the time it was used at the fire station (1986-2015). In fact, it was taken out every day for at least some type of short run. The fire chief who was there in 1986 vowed to never get another truck – and to keep this one running forever. But eventually, a new generation of fire department administrators decided it was time to get a new truck.

Brindlee Mountain Fire Apparatus is one of the world's largest used fire truck sales and service companies. Based just outside of Huntsville, Alabama, the company has forty-five full-time personnel occupying over 12,000 square feet. Our mechanics, all of whom are EVT certified, perform pump tests, general repairs, preventative maintenance, and body, collision, and paint work on over 500 used fire trucks every year.
