○ Federal Q Siren

○ Ground Ladders: Ground Ladders Included ○ Additional equipment not included with purchase unless otherwise listed. Mileage readings may not be real-time and should be confirmed.

○ Length: 28' 11"

○ Height: Truck Height: 9' 3"

○ GVWR: 40,000

○ Wheelbase: 184"

○ Seller's Information About this Truck:

The low mileage on this truck is accurate.

The city is fairly small, and over the years the truck did not go out on that many calls.

I did a phone interview with the man who was the main driver of this truck up until around Sept. of 2013. He said it drove pretty good, accelerated fine and stopped fine. In the last two years, they had made repairs to the water tank and done some cabinet work. He said the truck was serviced every year, and he felt like the interior could be described as "reasonable." Three firefighters sat inside the cab and two more could sit in jump seats outside.

You will find six 3-ring binders, related to the truck (4 binders) and to the Waterous Pumping System (2 binders). These are great books about the operation, maintenance and parts for the truck. The Waterous books show, in great detail, all about the pumping system.

Inside one of the Operation books, there are probably over 100 (totally organized) monthly Apparatus Check List" charts, that show the mileage for each check-up and have places for check marks for things like: engine oil, battery levels, tire air pressure, lights, belts, control handles, power steering, etc. There are also about 60+ monthly engine checklist sheets.

Brindlee Mountain Fire Apparatus is one of the world's largest used fire truck sales and service companies. Based just outside of Huntsville, Alabama, the company has forty-five full-time personnel occupying over 12,000 square feet. Our mechanics, all of whom are EVT certified, perform pump tests, general repairs, preventative maintenance, and body, collision, and paint work on over 500 used fire trucks every year.
