Door facing upwards 60 "long 38 "high, 28" deep, 30 degree rear

Aluminum (lifetime warranty) vs Poly is:

- 2.98 times more dense (g/cm<sup>2</sup>)
- 62.72 times more elastic (GPA)
- 3.92 times more resistant to high temperature (° C)
- 20.83 times more rigid versus its weight (MN-m/kg)
- 2.12 times more strong versus its weight (kN-m/kg)
- 20.0 less fragile times at-40 ° F and +.
- 1.55 times faster unloading.
- 9.75 times more resistant to pressure from loading
- 6.30 times more elastic (MPa)
- Much safer thanks to its centre of gravity very low more easy maintenance.
- Much easier to repair and maintain.
- Tensile strength of polypropylene is 4,500 psi
- Tensile strength of aluminium is 44,000 psi

-Whelen lighting system

-Perimeter lights -

Scene lights -

Bar Justice -

Reflective strips -Rear chevrons NFPA -

Pare shock ultra rugged reflective & non-slip -

Scale within the gateway support -

Anode -Lighting of the LED chests

-Rearview with 7 " colour screen camera & sound

-Hooks front & rear -

3 hose suction holders -

2 water level indicators -

Sliding drawer -

Heating -Input for portable pump  
-Battery charger -Kussmaul auto eject & air  
eject

Brindlee Mountain Fire Apparatus is one of the world's largest used fire truck sales and service companies. Based just outside of Huntsville, Alabama, the company has forty-five full-time personnel occupying over 12,000 square feet. Our mechanics, all of whom are EVT certified, perform pump tests, general repairs, preventative maintenance, and body, collision, and paint work on over 500 used fire trucks every year.
